ELSEVIER International Journal of Mass Spectrometry and Ion Processes 165/166 (1997) 657–664

Subject index

Ab initio calculations
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179
Ab initio study
The gas phase Payne rearrangement. Part 2. Methyl substitution: a joint ab initio and experimental study 139
Ab initio
Unimolecular reactions of protonated hydrazine. Reaction mechanisms and dynamics from observation of metastable ion fragmentations and *ab initio* calculations 39
Acetolactone
Generation of α-acetolactone and the acetoxyl diradical $^{\bullet}CH_2COO^{\bullet}$ in the gas phase 71
Alkyl radical loss
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Amines
Identification of the electronic transitions in the double ionization of six amines to singlet electronic states of their dications 107
A flowing-afterglow study of the reactions of trimethylsilylium ($(CH_3)_3Si^+$) with ammonia and some alkylamines 195
Amipurimycin precursors
Mass spectrometric study of the amipurimycin hexopyranosidic sugar moiety 561
Ammonia
A flowing-afterglow study of the reactions of trimethylsilylium ($(CH_3)_3Si^+$) with ammonia and some alkylamines 195
Analytical protocol
Tandem mass spectrometric determination of polychlorodibenzo-*p*-dioxins and polychlorodibenzofurans in a quadrupole ion trap using multi-frequency resonant excitation 595
Angular scattering
Collision-induced dissociation of low energy benzene ions 237
Antibodies
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric characterization of high molecular mass Starburst™ dendrimers 405
Axialization
Two-plate vs. four-plate azimuthal quadrupolar excitation for FT-ICR mass spectrometry 327

Biradicals
Generation of α-acetolactone and the acetoxyl diradical $^{\bullet}CH_2COO^{\bullet}$ in the gas phase 71
Bis[(benzo-15-crown-5)-15-ylmethyl] pimelate
Conformations of alkali ion cationized polyethers in the gas phase: polyethlene glycol and bis[(benzo-15-crown-5)-15-ylmethly] pimelate 377
Bracketing method
Proton-bound dimers of aliphatic carboxamides: gas-phase basicity and dissociation energy 49

^{13}C solid state NMR
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179
CAD
Gas phase investigations of sulfonium salts by electrospray FT-ICR/MS 577
CF^+ ions
Experimental determination of the radiative lifetimes of $CF^+(X^1\Sigma^+, v)$ ions 97
CHEF
Mass selection of ions in a Fourier transform ion cyclotron resonance trap using correlated harmonic excitation fields (CHEF) 209
Carbohydrates
Mass spectrometric study of the amipurimycin hexopyranosidic sugar moiety 561
Carbon cluster ions
Photodissociation studies of C_n^+ at 193 nm ($n = 5–19$) 299
Carbosilane
The MALDI mass spectra of carbosilane-based dendrimers containing up to eight fixed positive or 16 negative charges 349

Cationized polyethers
Conformations of alkali ion cationized polyethers in the gas phase: polyethlene glycol and bis[(benzo-15-crown-5)-15-ylmethyl] pimelate 377
Charge separation
Gas-phase reactions of singly and multiply-charged fullerene cations, C_{60}^{x+} (x = 1–3), with iron pentacarbonyl: kinetic control by Coulombic barriers 249
Charge site catalysis
Reactions of alkyl halides with distonic acylium radical cations 315
Charge transfer
SIFT studies of the reactions of H_3O^+, NO^+ and O_2^+ with a series of aldehydes and ketones 25
Chemical ionization
SIFT studies of the reactions of H_3O^+, NO^+ and O_2^+ with a series of aldehydes and ketones 25
Chemical ionization of the nitrate ester explosives EGDN and PETN by trimethylsilyl cation and comparison of the reactivity of nitrate ester and nitro explosives toward trimethylsilyl cation 641
Chlorine-specific detection
Dissociative electron attachment negative ion mass spectrometry: a chlorine-specific detector for gas chromatography 625
Chlorins
Formation of metalloporphyrins and metallochlorins in the source of a mass spectrometer under fast atom bombardment 551
γ-cleavage
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Clusters
The chemistry of Sr^{2+} in association with propanol clusters 5
Collision activation
Generation of α-acetolactone and the acetoxyl diradical $^{\bullet}CH_2COO^{\bullet}$ in the gas phase 71
Collision-induced dissociation
Collsion-induced dissociation of low energy benzene ions 237
Studies of the dissociation mechanisms of deprotonated mononucleotides by energy resolved collison-induced dissociation 433
Collision-induced dissociation of protonated guanine 475
Collisional activation
Fragmentation efficiencies of peptide ions following low energy collisional activation 509
Collisionally activated dissociation
Photodissociation and collisionally activated dissociation tandem mass spectrometric studies of difluoro[triazol-1-ylmethyl]benzhydrols and related compounds in a quadruple ion trap 13
Competition experiment
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Complexes
The MALDI mass spectra of carbosilane-based dendrimers containing up to eight fixed positive or 16 negative charges 349
Composite procedures
Heats of formation of gas-phase ions calculated by composite ab initio procedures 63
Computer modeling
Evaluation of the variables that effect resolution in delayed extraction MALDI-TOF 221
Conformation
Fragmentation efficiencies of peptide ions following low energy collisional activation 509
Conformations
Conformations of alkali ion cationized polyethers in the gas phase: polyethlene glycol and bis[(benzo-15-crown-5)-15-ylmethyl] pimelate 377
Consecutive reactions
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Coulomb explosion
The chemistry of Sr^{2+} in association with propanol clusters 5
Coulombic barriers
Gas-phase reactions of singly and multiply-charged fullerene cations, C_{60}^{x+} (x = 1–3), with iron pentacarbonyl: kinetic control by Coulombic barriers 249
Cyclodextrin
Cyclodextrin-piroxicam inclusion complexes: analyses by mass spectrometry and molecular modelling 523
Cyclotron
Two-plate vs. four-plate azimuthal quadrupolar exciation for FT-ICR mass spectrometry 327
Cytochrome *c*
High resolution ion mobility measurements for gas phase proteins: correlation between solution phase and gas phase conformation 497

DCI/MS
Block microstructural characterization of copolymers formed from fluorinated and non-fluorinated alkyl 391

DNA
Double stranded DNA sequencing by tandem mass spectrometry 457
Decomposition
Decomposition of 3,5-diaryloxathiolane-2-oxides under electron impact 611
Delayed ion formation
Evaluation of the variables that effect resolution in delayed extraction MALDI-TOF 221
Dendrimer
The MALDI mass spectra of carbosilane-based dendrimers containing up to eight fixed positive or 16 negative charges 349
Dendrimers
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric characterization of high molecular mass Starburst™ dendrimers 405
Deprotonated mononucleotides
Studies of the dissociation mechanisms of deprotonated mononucleotides by energy resolved collision-induced dissociation 433
Deprotonation method
Proton-bound dimers of aliphatic carboxamides: gas-phase basicity and dissociation energy 49
3,5-Diaryloxathiolane-2-oxides
Decomposition of 3,5-diaryloxathiolane-2-oxides under electron impact 611
Diclofop acid
Internal energy distribution of carboxylate negative-ions of the herbicide diclofop acid in the gas-phase 585
Direct dynamics
Unimolecular reactions of protonated hydrazine. Reaction mechanisms and dynamics from observation of metastable ion fragmentations and *ab initio* calculations 39
Dissociation energies
Photodissociation studies of C_n^+ at 193 nm (n = 5–19) 299
Dissociative electron attachment
Dissociative electron attachment negative ion mass spectrometry: a chlorine-specific detector for gas chromatography 625
Distonic ions
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Reactions of alkyl halides with distonic acylium radical cations 315
Double-charge-transfer spectroscopy
Identification of the electronic transitions in the double ionization of six amines to singlet electronic states of their dications 107
Double-ionization energy
Identification of the electronic transitions in the double ionization of six amines to singlet electronic states of their dications 107
Doubly charged
The chemistry of Sr^{2+} in association with propanol clusters 5

EGDN
Chemical ionization of the nitrate ester explosives EGDN and PETN by trimethylsilyl cation and comparison of the reactivity of nitrate ester and nitro explosives toward trimethylsilyl cation 641
Electron capture negative-ion mass spectrometry
Internal energy distribution of carboxylate negative-ions of the herbicide diclofop acid in the gas-phase 585
Electron impact
Decomposition of 3,5-diaryloxathiolane-2-oxides under electron impact 611
Electronic transitions
Identification of the electronic transitions in the double ionization of six amines to singlet electronic states of their dications 107
Electrospray ionization
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric characterization of high molecular mass Starburst™ dendrimers 405
MALDI-TOF and electrospray tandem mass spectrometric analysis of fatty acyl-CoA esters 467
Fragmentation and reactions of organophosphate ions produced by electrospray ionization 533
Electrospray
Double stranded DNA sequencing by tandem mass spectrometry 457
High resolution ion mobility measurements for gas phase proteins: correlation between solution phase and gas phase conformations 497
Fragmentation efficiencies of peptide ions following low energy collisional activation 509
Gas phase investigations of sulfonium salts by electrospray FT-ICR/MS 577
Elimination
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Energetics
Selected ion flow tube studies of S_2^+ reactions with a series of organic molecules 257

Energy deposition
Collision-induced dissociation of low energy benzene ions 237
Energy loss spectrometry
High-resolution ion translational energy spectroscopy of electronic excitation of homonuclear diatomic molecules in ion molecule collisions 119

FAB source
Formation of metalloporphyrins and metallochlorins in the source of a mass spectrometer under fast atom bombardment 551
FAB
Structure determination of isomeric hexadeoxynucleotide photoproducts by high-field NMR and fast atom 487
FT-ICR
Mass selection of ions in a Fourier transform ion cyclotron resonance trap using correlated harmonic excitation fields (CHEF) 209
Two-plate vs. four-plate azimuthal quadrupolar exciation for FT-ICR mass spectrometry 327
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric characterization of high molecular mass Starburst™ dendrimers 405
Gas phase investigations of sulfonium salts by electrospray FT-ICR/MS 577
Chemical ionization of the nitrate ester explosives EGDN and PETN by trimethylsilyl cation and comparison of the reactivity of nitrate ester and nitro explosives toward trimethylsilyl cation 641
FT-MS
Mass selection of ions in a Fourier transform ion cyclotron resonance trap using correlated harmonic excitation fields (CHEF) 209
FTMS
Studies on gas-phase positive ion-molecule reactions initiated by proton transfer to alcohols: the reactions of 2-methyl-2-propanol (*t*-butyl alcohol) with H_3O^+ in a Fourier transforms mass spectrometer (FTMS) 169
Two-plate vs. four-plate azimuthal quadrupolar excitation for FT-ICR mass spectrometry 327
Flow tube
A flowing-afterglow study of the reactions of trimethylsilylium ($(CH_3)_3Si^+$) with ammonia and some alkylamines 195
Fluorinated polymer
Block microstructural characterization of copolymers formed from fluorinated and non-fluorinated alkyl polyisocyanates using desorption chemical ionization mass spectrometry 391
Flutriafol
Photodissociation and collisionally activated dissociation tandem mass spectrometric studies of difluoro[triazol-1-ylmethyl]benzhydrols and related compounds in a quadruple ion trap 13
Fourier transform mass spectrometry
Two dimensional many particle simulation of trapped ions 271
Fourier-transform MS
Double stranded DNA sequencing by tandem mass spectrometry 457
Fragmentations
Fragmentation and reactions of organophosphate ions produced by electrospray ionization 533
Fullerene ions
Gas-phase reactions of singly and multiply-charged fullerene cations, C_{60}^{x+} (x = 1–3), with iron pentacarbonyl: kinetic control by Coulombic barriers 249

Gas chromatograms
Dissociative electron attachment negative ion mass spectrometry: a chlorine-specific detector for gas chromatography 625
Gas phase basicity
Proton-bound dimers of aliphatic carboxamides: gas-phase basicity and dissociation energy 49
Gas-phase chemistry
Internal energy distribution of carboxylate negative-ions of the herbicide diclofop acid in the gas-phase 585
Gas-phase ions
Heats of formation of gas-phase ions calculated by composite ab initio procedures 63
Guanine
Collision-induced dissociation of protonated guanine 475

Halogen abstraction
Reactions of alkyl halides with distonic acylium radical cations 315
Heats of formation
Heats of formation of gas-phase ions calculated by composite ab initio procedures 63
Helical copolymer
Block microstructural characterization of copolymers formed from fluorinated and non-fluorinated alkyl polyisocyanates using desorption chemical ionization mass spectrometry 391
Hexadecyl coenzyme A
MALDI-TOF and electrospray tandem mass spectrometric analysis of fatty acyl-CoA esters 467

Homonuclear diatomic molecules
High-resolution ion translational energy spectroscopy of electronic excitation of homonuclear diatomic molecules in ion molecule collisions 119
Hydride ion transfer
SIFT studies of the reactions of H_3O^+, NO^+ and O_2^+ with a series of aldehydes and ketones 25
Hydrogen shift
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Hydrogen
High-resolution ion translational energy spectroscopy of electronic excitation of homonuclear diatomic molecules in ion molecule collisions 119

ICR
Two-plate vs. four-plate azimuthal quadrupolar excitation for FT-ICR mass spectrometry 327
Impulsive collisions
Collision-induced dissociation of low energy benzene ions 237
Inclusion complex
Cyclodextrin-piroxicam inclusion complexes: analyses by mass spectrometry and molecular modelling 523
Initial position
Evaluation of the variables that effect resolution in delayed extraction MALDI-TOF 221
Initial velocity
Evaluation of the variables that effect resolution in delayed extraction MALDI-TOF 221
Intercharge distance
Kinetic energy release and intercharge distance of the protonitronium dication ($HONO^{2+}$) 1
Internal energy content
Experimental determinations of the radiative lifetimes of $CF^+(X^1\Sigma^+, v)$ ions 97
Interstellar chemistry
Selected ion flow tube studies of S_2^+ reactions with a series of organic molecules 257
Ion cyclotron resonance
Photodissociation studies of C_n^+ at 193 nm (n = 5–19) 299
Ion selection
Mass selection of ions in a Fourier transform ion cyclotron resonance trap using correlated harmonic excitation fields (CHEF) 209
Ion structures
A comparative study of gas-phase ion/molecule reactions in $Si(OCH_3)_4$ and $Si(OC_2H_5)_4$ 83
Ion trap
Two dimensional many particle simulation of trapped ions 271
Ion–molecule reactions
SIFT studies of the reactions of H_3O^+, NO^+ and O_2^+ with a series of aldehydes and ketones 25
Reactions of alkyl halides with distonic acylium radical cations 315
Ion-ion reactions
Ion-ion proton transfer reactions of multiply-charged oligonucleotide cations 419
Ion-molecule reactions
Studies on gas-phase positive ion-molecule reactions initiated by proton transfer to alcohols: the reactions of 2-methyl-2-propanol (*t*-butyl alcohol) with H_3O^+ in a Fourier transforms mass spectrometer (FTMS) 169
Selected ion flow tube studies of S_2^+ reactions with a series of organic molecules 257
Ionic polymerization
A comparative study of gas-phase ion/molecule reactions in $Si(OCH_3)_4$ and $Si(OC_2H_5)_4$ 83
Ionization process(es)
Evaluation of the variables that effect resolution in delayed extraction MALDI-TOF 221
Iron pentacarbonyl
Gas-phase reactions of singly and multiply-charged fullerene cations, C_{60}^{x+} (x = 1–3), with iron pentacarbonyl: kinetic control by Coulombic barriers 249
Isomers
The gas phase Payne rearrangement. Part 2. Methyl substitution: a joint ab initio and experimental study 139

Keto–enol tautomerization
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179
Kinetic energy release
Kinetic energy release and intercharge distance of the protonitronium dication ($HONO^{2+}$) 1
Kinetic method
Proton-bound dimers of aliphatic carboxamides: gas-phase basicity and dissociation energy 49
Kinetics
A flowing-afterglow study of the reactions of trimethylsilylium ($(CH_3)_3Si^+$) with ammonia and some alkylamines 195

^{18}O-labelling
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179

LSIMS-CID
Mass spectrometric study of the amipurimycin hexopyranosidic sugar moiety 561
Lipid analysis
MALDI-TOF and electrospray tandem mass spectrometric analysis of fatty acyl-CoA esters 467

MALDI-TOF
MALDI-TOF and electrospray tandem mass spectrometric analysis of fatty acyl-CoA esters 467
MS-MS
Mass selection of ions in a Fourier transform ion cyclotron resonance trap using correlated harmonic excitation fields (CHEF) 209
Block microstructural characterization of copolymers formed from fluorinated and non-fluorinated alkyl 391
Mass spectrometric study of the amipurimycin hexopyranosidic sugar moiety 561
Magnetron
Two-plate vs. four-plate azimuthal quadrupolar excitation for FT-ICR mass spectrometry 327
Mass spectrometry
Gas phase investigations of sulfonium salts by electrospray FT-ICR/MS 577
Matrix-assisted laser desorption ionization
The MALDI mass spectra of carbosilane-based dendrimers containing up to eight fixed positive or 16 negative charges 349
Metallochlorins
Formation of metalloporphyrins and metallochlorins in the source of a mass spectrometer under fast atom bombardment 551
Metastable peaks
Kinetic energy release and intercharge distance of the protonitronium dication ($HONO^{2+}$) 1
Metastable
Reactions of metastable ionized γ, γ-dialkylallyl methyl ethers: relative rates for elimination of alkyl radicals by formal γ-cleavage 155
Methylguanines
Collision-induced dissociation of protonated guanine 475
Molecular modelling
Cyclodextrin-piroxicam inclusion complexes: analyses by mass spectrometry and molecular modelling 523
Multi-frequency resonant excitation
Tandem mass spectrometric determination of polychlorodibenzo-*p*-dioxins and polychlorodibenzofurans in a quadrupole ion trap using multi-frequency resonant excitation 595
Multiply-charged cations
Ion-ion proton transfer reactions of multiply-charged oligonucleotide cations 419

NMR
Structure determination of isomeric hexadeoxynucleotide photoproducts by high-field NMR and fast atom bombardment/tandem mass spectrometry 487
Negative ion chemical ionization
Dissociative electron attachment negative ion mass spectrometry: a chlorine-specific detector for gas chromatography 625
Neutralization–reionization mass spectrometry
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179
Neutralization-reionization
Generation of α-acetolactone and the acetoxyl diradical $^{\bullet}CH_2COO^{\bullet}$ in the gas phase 71
Nitrogen
High-resolution ion translational energy spectroscopy of electronic excitation of homonuclear diatomic molecules in ion molecules collisons 119
Non-covalent interaction
Cyclodextrin-piroxicam inclusion complexes: analyses by mass spectrometry and molecular modelling 523
Non-neutral plasma
Two dimensional many particle simulation of trapped ions 271
Nucleic acid bases
Collision-induced dissociation of protonated guanine 475
Nucleophilic addition
A comparative study of gas-phase ion/molecule reactions in $Si(OCH_3)_4$ and $Si(OC_2H_5)_4$ 83

Oligonucleotide
Ion-ion proton transfer reactions of multiply-charged oligonucleotide cations 419
Organophosphate ions
Fragmentation and reactions of organophosphate ions produced by electrospray ionization 533
Oxalacetic acid
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179
Oxygen
High-resolution ion translational energy spectroscopy of electronic excitation of homonuclear diatomic molecules in ion molecule collisions 119

PETN
Chemical ionization of the nitrate ester explosives EGDN and PETN by trimethylsilyl cation and

comparison of the reactivity of nitrate ester and nitro explosives toward trimethylsilyl cation 641
Payne rearrangement
The gas phase Payne rearrangement. Part 2. Methyl substitution: a joint ab initio and experimental study 139
Penning
Two-plate vs. four-plate azimuthal quadrupolar excitation for FT-ICR mass spectrometry 327
Peptides
Fragmentation efficiencies of peptide ions following low energy collisional activation 509
Photodissociation
Photodissociation and collisionally activated dissociation tandem mass spectrometric studies of difluoro[triazol-1-ylmethyl]benzhydrols and related compounds in a quadruple ion trap 13
Photodissociation studies of C_n^+ at 193 nm (n = 5–19) 299
Photoproducts
Structure determination of isomeric hexadeoxynucleotide photoproducts by high-field NMR and fast atom bombardment/tandem mass spectrometry 487
Piroxicam
Cyclodextrin-piroxicam inclusion complexes: analyses by mass spectrometry and molecular modelling 523
Plasma simulation
Two dimensional many particle simulation of trapped ions 271
Polychlorodibenzo-*p*-dioxins
Tandem mass spectrometric determination of polychlorodibenzo-*p*-dioxins and polychlorodibenzofurans in a quadrupole ion trap using multi-frequency resonant excitation 595
Polychlorodibenzofurans
Tandem mass spectrometric determination of polychlorodibenzo-*p*-dioxins and polychlorodibenzofurans in a quadrupole ion trap using multi-frequency resonant excitation 595
Polyethylene glycol
Conformations of alkali ion cationized polyethers in the gas phase: polyethlene glycol and bis[(benzo-15-crown-5)-15-ylmethyl] pimelate 377
Polymers
The MALDI mass spectra of carbosilane-based dendrimers containing up to eight fixed positive or 16 negative charges 349
Electrospray ionization Fourier transform ion cyclotron resonance mass spectrometric characterization of high molecular mass Starburst™ dendrimers 405
Porphyrins
Formation of metalloporphyrins and metallochlorins in the source of a mass spectrometer under fast atom bombardment 551
Post source decay
MALDI-TOF and electrospray tandem mass spectrometric analysis of fatty acyl-CoA esters 467
Propanol
The chemistry of Sr^{2+} in association with propanol clusters 5
Protein conformation
High resolution ion mobility measurements for gas phase proteins: correlation between solution phase and gas phase conformations 497
Proton affinity
Unimolecular reactions of protonated hydrazine. Reaction mechanisms and dynamics from observation of metastable ion fragmentations and *ab initio* calculations 39
Proton-bound dimeres of aliphatic carboxamides: gas-phase basicity and dissociation energy 49
Proton mobility
Proton mobility in protonated amino acids and peptides 339
Proton transfer
SIFT studies of the reactions of H_3O^+, NO^+ and O_2^+ with a series of aldehydes and ketones 25
Studies on gas-phase positive ion-molecule reactions initiated by proton transfer to alcohols: the reactions of 2-methyl-2-propanol (*t*-butyl alcohol) with H_3O^+ in a Fourier transforms mass spectrometer (FTMS) 169
Protonated amino acids
Proton mobility in protonated amino acids and peptides 339
Protonated peptides
Proton mobility in protonated amino acids and peptides 339
Pyrolysis
Block microstructural characterization of copolymers formed from fluorinated and non-fluorinated alkyl polyisocyanates using desorption chemical ionization mass spectrometry 391

Quadrupole ion trap tandem mass spectrometry
Photodissociation and collisionally activated dissociation tandem mass spectrometric studies of difluoro[triazol-1-ylmethyl]benzhydrols and related compounds in a quadruple ion trap 13
Quadrupole ion trap
Ion-ion proton transfer reactions of multiply-charged oligonucleotide cations 419

Tandem mass spectrometric determination of polychlorodibenzo-*p*-dioxins and polychlorodibenzofurans in a quadrupole ion trap using multi-frequency resonant excitation 595
Quadrupole
Two-plate vs. four-plate azimuthal quadrupolar excitation for FT-ICR mass spectrometry 327

Radiative lifetimes
Experimental determination of the radiative lifetimes of $CF^+(X^1\Sigma^+, v)$ ions 97
Radical reactions
Reactions of alkyl halides with distonic acylium radical cations 315
Rate coefficients
Selected ion flow tube studies of S_2^+ reactions with a series of organic molecules 257
Reaction dynamics
Collision-induced dissociation of low energy benzene ions 237

SIFT
SIFT studies of the reactions of H_3O^+, NO^+ and O_2^+ with a series of aldehydes and ketones 25
Sequencing
Double stranded DNA sequencing by tandem mass spectrometry 457
$Si(CH_3)_3^+$
Chemical ionization of the nitrate ester explosives EGDN and PETN by trimethylsilyl cation and comparison of the reactivity of nitrate ester and nitro explosives toward trimethylsilyl cation 641
Si-containing ions
A comparative study of gas-phase ion/molecule reactions in $Si(OCH_3)_4$ and $Si(OC_2H_5)_4$ 83
Singlet electronic states
Identification of the electronic transitions in the double ionization of six amines to singlet electronic states of their dictations 107
Strontium
The chemistry of Sr^{2+} in association with propanol clusters 5
Structures
Fragmentation and reactions of organophosphate ions produced by electrospray ionization 533
Sulfonium salts
Gas phase investigations of sulfonium salts by electrospray FT-ICR/MS 577
Sulfur dimercation
Selected ion flow tube studies of S_2^+ reactions with a series of organic molecules 257

T-rich hexadeoxynucleotides
Structure determination of isomeric hexadeoxynucleotide photoproducts by high-field NMR and fast atom bombardment/tandem mass spectrometry 487
Tandem MS
Fragmentation efficiencies of peptide ions following low energy collisional activation 509
Tandem mass spectrometry
The intriguing behaviour of (ionized) oxalacetic acid investigated by tandem mass spectrometry 179
Structure determination of isomeric hexadeoxynucleotide photoproducts by high-field NMR and fast atom bombardment/tandem mass spectrometry 487
Tandem
Double stranded DNA sequencing by tandem mass spectrometry 457
Tetraalkoxysilanes
A comparative study of gas-phase ion/molecule reactions in $Si(OCH_3)_4$ and $Si(OC_2H_5)_4$ 83
Threshold energies
Studies of the dissociation mechanisms of deprotonated mononucleotides by energy resolved collision-induced dissociation 433
Translational energy release
Unimolecular reactions of protonated hydrazine. Reaction mechanisms and dynamics from observation of metastable ion fragmentations and *ab initio* calculations 39
Trimethylsilylium
A flowing-afterglow study of the reactions of trimethylsilylium ($(CH_3)_3Si^+$) with ammonia and some alkylamines 195
Triple quadrupole mass spectrometer
Studies of the dissociation mechanisms of deprotonated mononucleotides by energy resolved collision-induced dissociation 433

Unimolecular chemistry
Unimolecular reactions of protonated hydrazine. Reaction mechanisms and dynamics from observation of metastable ion fragmentation and *ab inito* calculations 39
